Dhaka, Bangladesh

CAREER OBJECTIVE

As a web developer, my goal is to build website applications that enhance and drive business success. I am eager to explain my skills and explore new technologies to bring innovative ideas to life.

SKILLS

Expertise : HTML, CSS, Bootstrap, Tailwind, DaisyUI, JavaScript, ES6, React.js

Comfortable : Express.js, MongoDB, Firebase, JWT, Redux

Familiar : Node.js, Axios

Tools : VSCode, Git, Github, Figma, Netlify, Vercel, Jira Software

PROJECTS

summerSports - a course management app for summer camp [Live](#) | Github: [Client](#) | [Server](#)

- This is a website for students to spend their summercamp by learning various types of sports.
- By using dashboard an students can easily maintain their programme, enrollment and payment.
- If you are an instructor you can add your own course which will be visible to the students.
- An instructor can maintain their added course and get updates by instructor dashboard.
- Finally the admin can maintain all user and instructor e.g. changing the role of the user.

Technologies: Tailwind, React.js, Node.js, Express.js, MongoDB, Firebase, JWT, Vercel, Stripe, Axios

Carz Zone - a toy car marketplace [Live](#) | Github: [Client](#) | [Server](#)

- Carz Zone is a toy car marketplace where you can buy and sell verious types of toy carl
- Here sellers can add their product and update the data or delete it in their own route.
- Updated product will be shown on the All Toy route and home route.
- There also have a car details route to show each cars detail informations

Technologies: React.js, TailwindCSS, Firebase, Node.js, Express.js, MongoDB, Vercel

SQUAD - a task management app [Live](#) | Github: [Client](#) | [Server](#)

- This app provides you private, public and mentioned board (for group work).
- Public board will be show to everyone but they will not have access to do any type of actions.
- You can only perform action in your own board and if someone mention your emain in their board.
- Each board contains to do, doing and done functionality. You can add, delete or update it.

Technologies: React.js, TailwindCSS, Firebase, Node.js, Express.js, MongoDB, Vercel
